

10th August 2008:

Nvolve Release Version 2 of its market leading Blended LMS with accredited courseware for Food Manufacturing

Many organisations in the food and manufacturing industries are faced with increasing pressure to train employees in order to meet regulatory requirements, upskill or cross train employees. Organisations have now recognised that traditional approaches to training assessment and management fail to deliver maximum return on tight training budgets, especially heading into this harsh economic climate.

Lee Tedstone of Nvolve says “our learning management system allows organisations within the food industry to train and manage their staff in areas of health and safety, food hygiene and HACCP. Our clients are now able to manage and deliver their training at a fraction of the time and cost of the traditional paper-based classroom or first-generation Learning Management Systems and can provide unprecedented ability to demonstrate compliance across their organisation”.

A Sample of the Courses Nvolve offer Include:

Food Hygiene

- An introduction to Food Hygiene
- Food Hygiene – Principles and practices
- HACCP Awareness for food business employees
- Working Safely Version 3.0
- DSE and Workstation Health & Safety
- Fire Safety and Evacuation
- Safe Manual Handling
- Avoiding Slips, Trips and Falls
- Handling Stress at Work – A Guide for Managers and staff
- Managing Health & Safety
- RSI – What It Is and How to Avoid It
- Risk Assessment for Managers
- Staying Safe with Noise
- Staying Safe with Hazardous Substances
