

16th September 2008:

Nvolve Limited Launch New Venture 'Software Solutions Division Service'

Neela Srinivasian (Project Manager - Nvolve Ltd), P.S Ragavan (Indian Ambassador to Ireland) & Lee Tedstone (Director – Nvolve Ltd)

Nvolve limited launched their new venture 'Software Solutions Division Service' on Monday the 15th of September with the aid of the Indian Ambassador to Ireland, P.S. Raghavan on his recent visit to Letterkenny. Lee Tedstone, Director at Nvolve, explained to the Ambassador how the Nvolve Local Offshore service would address some of the issues companies are facing in the current economic climate.

Nvolve realise that one of the main challenges of going offshore for software development is the risk factor of getting a good service which is why the company offers a Satisfied Service Guarantee to all new clients. The company will scope your project with you and agree your requirements and they will then start work on the project and if after 1 month if clients are not 100% satisfied then they do not have to pay anything.

The Nvolve Local Offshore software development service allows companies to avail of a wide range of IT resources that are highly motivated and multi skilled in many software skills such as ASP.net, Sharepoint, MSSQL, MySQL, PHP and many more. The team can be engaged purely "on demand" with no long term commitment and the term can be for 1 week or 1 year.

Nvolve also provides a local project manager for all our clients so that the client can deal locally with an experienced project manager who then manages the core team in India.

Nvolve, a software development company based in Donegal have been using an Indian design centre for the past 4 years in the development of the Nvolve Response™ Blended Learning solution which the company now sells to the market. This relationship with the Indian partner was cemented in 2007 when Nvolve took an equity stake in that business and the company is now making their Indian development team available to other companies so that they can avail of the same benefits and cost savings as they have.

Lee Tedstone, Director at Nvolve says "Our Indian development team have excellent IT skills and a professional approach to software development. Nvolve has been able to gain many benefits by going offshore to India for software development skills and we are now making these same benefits available to other companies in the area"
