PerfecSeal Europe Implements Nvolve's GroupLearner™ Solution for in-house Training Requirements

PerfecSeal wanted a quick and easy solution to undertake training in-house. After analysing the marketplace they decided to implement the GroupLearner™ solution due to the simplicity and affordability of this technology. PerfecSeal are worldwide leading suppliers of flexible medical packaging medical films and custom thermoformed trays for the healthcare industry and require a lot of in-house training among employees.

GroupLearner™ combines City and Guilds accredited courseware along with a unique keypad training system to enable organisations to train and assess 100's of people in a very short space of time. The process involved is that you simply bring together a group of trainees (up to 100 at a time), show them the GroupLearner™ training accredited courseware and they use the keypads to answer the assessment questions. An assessment record for every trainee is stored within the GroupLearner™ system which means that companies can access reports on each individual trainee and generate certificates at the click of a button.

GroupLearner™ partners with leading courseware suppliers making a large amount of courseware available. Users can chose from Food Safety Levels 1 and 2 in Manufacturing, Retail and Catering. They also have Health and Safety for Food Workers Level 2. All these courses are accredited by City and Guilds and can be completed in less than 2 hours. GroupLearner™ is looking forward to a long and lasting business relationship with Staffline in providing them with a unique training solution.

About Group Learner™

GroupLearner™ helps organisations in the Food, Manufacturing and Services industries save over 74% on the traditional cost of Food Safety training whilst at the same time making the whole process easier and hassle free. GroupLearner™ combines City and Guilds accredited courseware along with a unique keypad training system that enables companies to train and assess 100's of people in a very short space of time.
